### PROPOSED SUNDRY TARIFFS FOR THE 2011/2012 FINANCIAL YEAR

#### Report by the Executive Manager Finance

1. The sundry tariffs for service delivery by Council are annually revised at the time when the annual budget is being prepared and is aimed at the effective recovery of cost incurred to supply the related services.
2. The recommended tariffs for each service to apply with effect from the 1<sup>st</sup> of July 2011 are reflected under the comments of each manager of department.
3. Tariffs are based on actual cost and in certain limited cases to discourage undesirable actions or requests and levied in terms of Council's resolution or by-laws for specific services.
4. It is recommended:
  - 4.1 That the adjusted tariffs as reflected in the comments of the various managers of departments be approved for implementation with effect from 1 July 2011.
  - 4.2 That the sundry tariffs be VAT inclusive except those tariffs for services indicated with an (\*) which are exempted or out of scope of the VAT Act.
  - 4.3 That an admin fee of 15% be levied to a maximum of R800,00 when applicable.

### Tariffs relating to inspections on petroleum products

In accordance with the by-laws relating to the storage, use and handling of flammable liquids and substances Administrator's Notice 230 of 16 February 1983 the tariff of charges of R58,00 for flammable liquids and R116,00 for spray booths and stores be replaced by the following formula:

#### 1. Flammable liquids

Salary + Distance + Time + VAT

##### Salary

The hourly tariff of the inspection officer as provided by the salary office, based on level 9 of municipality tariff per hour or part thereof.

##### Remark

Level 9 is used as basis. This means it will be a station officer - fire prevention, and this kind of risk in any local authority demands certain responsibilities linked with certain qualifications.

##### Distance

Average distance between furthest and nearest point within the boundaries of the local authority multiplied by the kilometer tariff of that Council.

##### Time

Average time calculated from departure from the office including the inspection and time back at the office. The time is connected to flammable liquid capacities excluding gasses:

0	-	23 000 litre installations	:	30 minutes
23 000	-	83 000 litre installations	:	40 minutes
83 000	-	200 000 litre installations	:	60 minutes
200 000 +		litre installations	:	120 minutes

2. **Spray booths, spray cubicles, dip tanks, mixing rooms, flammable liquid stores, carbide stores and relevant installations**

Salary + Time + Distance + VAT

Salary and distance as above.

**Time**

60 minutes per installation which include travelling time.

3. **Gas**

0 - 48 kg installations : 20 minutes

48 - 960 kg installations : 30 minutes

960 kg and above : 60 minutes

After 60 minutes, calculate the time spent at the installation per hour or part thereof which exceed 60 minutes.

**Remark**

Manifolds are included above. This is in accordance with a maximum of 20 cylinders per manifold SANS 10087 (LPG).

SANS 10089 (Petroleum Product).

For a gas filling facility calculate the size of the supply tank in the formula.

For gas pipelines it is recommended that the maximum cylinder capacity of 960 kg be used in the formula. The time of the inspection will then affect the amount.

4. **Transport permit**

Salary + Certificate Cost + VAT

The cost is additional to the normal road worthy certificate tariffs.

Admin cost must be absorbed by the time in the formula and distance is provided for in the formula.

After six months the annual tariff must be divided in half of all the above items.

5. **Fire equipment serviceman**

R300,00 per year (1 January – 31 December) of each year + VAT.

6. **Fireworks – selling and distribution**

Salary + Distance + Time + VAT
