CHAPTER 1

INTRODUCTION

Steve Tshwete Local Municipality has identified a need to review its Local Economic Development Strategy of 2006 with a view of crafting a new LED Strategy. The local municipality has identified the LED Strategy as a key component in implementing its economic objectives within the Integrated Development Plan, therefore carrying one of its mandates of coordination and facilitating sustainable development and attracting economic investment.

In order to formulate an effective LED Strategy, the municipality formulated a few guidelines and/or aspects when drafting the plans:

- The municipality is utilizing various sources to understand the ever-changing local socio-economic environment; the current LED Strategy is outdated and does not address emerging socio-economic issues. Sources utilized to gather information for the new strategy include government institutions like Statistics South Africa, Nkangala District Municipality, the provincial Socio Economic Review Outlook and situational analysis as drafted by the Department of Finance, Economic Development and Tourism (Mpumalanga Provincial Government).

- That the 2015/16 Integrated Development Plan serves as a guiding document in formulating a new LED Strategy. The 2006 LED strategy will form the basis for review and analysis, incorporate new findings. Strategies formulated at the district level will contribute to the development of a local economic strategy. This will help aligning initiatives at municipal level with those at the district level.

- That the municipality embark on a detailed analysis of sector departmental plans with a view of documenting the identified sector opportunities.

- That the formulated LED Strategy will aid the budgeting process, measure its performances and give feedback to adjustment process in future.

- The municipality will monitor and continuously measure the impact of solicited private investment in the local economy, jobs created, revenue created and small and medium enterprises established.

- That the new LED Strategy assists the municipality in formulating relevant structures to ensure coordination of economic and investment issues.
Purpose of Strategy

The purpose of formulating an LED Strategy is to contribute to the implementation of economic plans from the overall planning of the municipality as detailed in the IDP. This strategy will collate economic information, projects identified by the broader plan (IDP), formulate a framework to investigate further sector opportunities and formulate priorities.

It is an important tool in creating sustainable local economies. It is a planning process of ensuring that the environment continues to bear the required outputs. It is used to integrate diverse sector strategies into one plenary tool.

In accordance to the Municipal Systems Act 32, 2000 (Act 32 of 2000), section 26 (c) provides for:

An integrated development plan must reflect:

(c) the council’s development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs.

The Local Economic Development and Planning is guided by various legislations in relations to their implications on the functioning of local municipality; below are a framework of such Acts and policies.

It therefore aims at facilitating a process of disseminating the collated economic information for strategy implementation purposes.

The overall goal of the strategy is summarised as follows:

‘To formulate a new LED Strategy informed by newly identified development needs, opportunities, priorities; guide the budgeting and implementing process, unlocking investor potential and creating economic and job opportunities; measuring economic performance and impact of private investment’.

Methodology

The LED Strategy formulation process commences with an analysis of the current LED Strategy as drafted in 2006; followed by a situational analysis of the district municipality an input made by various stakeholders through the investment summit. Sector departments have been consulted to integrate their industry plans into the LED Strategy.
The strategy formulation followed the following steps:

**Step One:**
- Formulating the strategy scope, mapping out objectives, and setting out possible consultative periods.
- Identifying role players and contributors to the strategy development.

**Step Two:**
- Analysis of all data obtained including secondary data, sector plans, etc.
- Studying environmental trends

**Step Three**
- Analysing economic profiles, establish relevance to scope and objectives of the LED Strategy.

**Step Four**
Establish an LED framework through integrating the identified opportunities into a holistic LED strategy plan; key objectives:
- Create sustainable job opportunities
- Solicit and attract private investment into the local economy.
- Develop infrastructure master plans to base future economic development
- Broaden tax and income base for the municipality.
- Enable development of SMMEs and Cooperatives
- Contribute to skills and human capital development
- Information sharing and database
Step Five

Implementation of the LED Strategy

- Describing the role of the LED within the municipality on implementing the strategy.
- Obtain funding of the LED Strategy Plan
- Solicit investments
- Monitoring and evaluation of the LED Strategy Plan
- Corporate Social Investment and Social Labour Plans

Location of the Municipality – Strategy Focus

Steve Tshwete Local Municipality is one of the six municipalities within the Nkangala District Municipality and located at the centre of the district municipality; it is also the seat of Nkangala District Municipality.

- It is located along the N4 / N12 corridor that connects Pretoria and Johannesburg to Mbombela and Mozambique.
- N11 corridor runs through the CBD town and links the Limpopo Province through Middelburg – Hendrina – Ermelo to Kwa-Zulu Natal province and the Richards Bay harbour.
- Railway lines link the municipality to regional economic Maputo harbour; one railway line runs from Johannesburg through Delmas and Ogies and connects with the other line that runs from Pretoria through Bonkhorstspruit and Emalahleni. It runs parallel to the N4 / N12 and provides an alternative freight between Gauteng, Mpumalanga to Maputo.
- Midlen corridor links Middelburg and Emalahleni, the two largest economies of the Mpumalanga province.
- The municipality houses three power stations (Komati, Hendrina, Arnot), south of the N4 / N12.

CHAPTER 2

2. SITUATIONAL ANALYSIS

2.1 What is Local Economic Development?

In accordance to the World Bank, LED can be broadly defined as an outcome of local initiatives by stakeholders identifying and using local resources, ideas and skills to stimulate economic growth and development. The outcome of this exercise is the creation of employment opportunities, alleviation of poverty, addressing the inequality whilst attracting external investment.

This planning process is located within the broader planning context, namely, regionally (Nkangala District), provincially (MEGDP) and nationally (National Development Planning, National Growth Path).

2.2 Guiding Principles

- LED aims at creating an environment conducive for private investment and job creation.
- It advocates the establishment of a master infrastructure plan that enables long term economic growth and development.
- It aims at promoting the establishment and support of small and medium enterprises.
- It targets previously disadvantaged individuals, thus reviving township economy.
- It is a partnership between government and key stakeholders, eg organized business, labour and civil society.
- It is a five year plan that is adjusted annually in order to accommodate rapidly changing socio-economic environment; flexible development planning process.
- It integrates diverse economic activities into a comprehensive approach.
- LED Strategies promotes local participation and ownership of resources.
- Sustainability and development big businesses.
2.3 Sector Opportunities

The purpose of this sub-section is to provide an assessment of the economic activities within the leading economic sectors in order to determine the sectors in STLM economy that have a comparative advantage. Table 1 illustrates the leading sectors. The sources of data used are from QLFS Q4 2013 and SERO 2013 on sectoral employment in NDM and local municipalities.

### Labour Profile

The pattern of overall unemployment rate in STLM has dramatically changed from 35.4% in 2001 to 19.7% in 2011 as seen from the table below. Therefore,
unemployment rate is 19.7% in STLM (Census 2011). In the municipality, 107 069 people are economically active people. The composite breakdown of unemployment in STLM shows youth unemployment rate of 27.1%, unemployment rate for females 27.8% and males 14.2% (Census 2011).

Statistics South Africa Census 2001 and 2011

2.5 Development and Income Profile

(a) Human Development Index (HDI)

The Human Development Index (HDI) is a composite, relative index that attempts to quantify the extent of human development of a community. It is based on measures of life expectancy, literacy and income. According to the United Nations, the HDI is considered high when it is 0.8 and higher, medium when it ranges between 0.5 to 0.8 and an index value of 0.5 and lower, will be considered as a low rating.

STLM’s HDI level improved from 0.62 in 2001 to 0.63 in 2007 and to 0.69 in 2011 (SERO, 2013). It is ranked the second best out of eighteen (18) municipalities in the entire province in terms of HDI.

(b) Gini-Coefficient

The Gini-coefficient is one of the most commonly used measures of income inequality. The Gini-coefficient of STLM shows an improving trend since 2001 from 0.68 to 0.65 in 2007 and to 0.60 in 2011 (SERO, 2013). Despite the decline in 2011, the level still reflects a more unequal income distribution.
(c) Poverty Rate

According to SERO 2014, STLM has the lowest poverty rate in the province. The poverty rate is at 20.7% in 2011 showing a decreasing trend from 31.6% in 2001 and 28.8% in 2007. STLM, with about 59 929 people living below the poverty income in 2011, had the lowest number of people in poverty.

Statistics South Africa Census 2001 and 2011 and SERO 2014

(d) Household Income

According to Census 2011, the average annual household income for all households in STLM increased from R 55 369 per annum in 2001 to R134 026 per annum in 2011 (table 6). This represents an absolute increase in nominal terms over the 10-year period, which was the highest among the eighteen local municipalities in the province. This is closely related to its higher education levels and employment rates.

Statistics SA, Census 2011

(e) Health Profile

Health care is the prevention, treatment, and management of illness and the preservation of mental and physical well-being through the services offered by the medical, primary healthcare, and allied health professions to the population of STLM. According to SERO 2013, in 2012, a total of 18 clinics were located within the STLM.
In addition STLM has 1 provincial hospital and no community health centres and a private hospital.

**(f) HIV prevalence**

Changes in the HIV prevalence of the female population distribution for the 15–49 age group in the municipality between 2009 and 2011 shows that in 2009 the prevalence rate was 33.8%, in 2010 24.3% and 2011 28.8% (SERO, 2013). The 2011 prevalence rate in STLM was the third highest in the province. The TB cases continued to show steady decline from 1 019 in 2010 to 844 in 2011 and to further 792 in 2012, the ninth highest in the province.

**(g) Housing Profile**

Housing type implies the structure of the dwelling a family occupies as their home. The main categories can be distinguished; these are formal permanent structures, traditional structures and informal non-permanent structures. Table 7 indicates the different dwelling types in the municipal area according to the Census 2011. Table 7 below shows a significant increase in the proportion of households residing in formal dwellings across the municipality, meanwhile there is decline in traditional dwellings. The informal dwellings declined from 1996 to 2001 and showed an upward trend from 2001 to 2011. The availability of suitable land and funding delays place cause a challenge on housing delivery in the municipality.

Statistics South Africa- Census 2011
In response to the municipal statutory obligation and the challenges faced, the municipality formulated a compressive strategic response to the management of infrastructure and community assets and the provision of services that are dependent on those.

(1) Access to Household Services

Steve Tshwete Local Municipality has made great strides in providing this basic service to its communities. The table below reflect the progress made:

**TABLE 10: HOUSEHOLDS WITH ACCESS TO SERVICES 2011**

<table>
<thead>
<tr>
<th>BASIC SERVICES</th>
<th>1996</th>
<th>2001</th>
<th>2011</th>
</tr>
</thead>
<tbody>
<tr>
<td>% of households with flush or chemical toilets</td>
<td>79.7%</td>
<td>87.5%</td>
<td>84.9%</td>
</tr>
<tr>
<td>% of households with connection to piped (tap) water: on site &amp; off site</td>
<td>88.9%</td>
<td>95.9%</td>
<td>98.2%</td>
</tr>
<tr>
<td>% of households with electricity for lighting</td>
<td>71.2%</td>

<td>90.8%</td>
</tr>
<tr>
<td>% of households with weekly municipal refuse removal</td>
<td>74.8%</td>
<td>82.6%</td>
<td>84.7%</td>
</tr>
<tr>
<td>---------------------------------------------------</td>
<td>-------</td>
<td>-------</td>
<td>-------</td>
</tr>
</tbody>
</table>

(2) Water and sanitation

Access to water and sanitation remains fairly high in STLM. The Census 2011 reveals that, 98.2% and 86.8% of households had access to potable water (household connections and communal stands) and flush and chemical toilets. In 2012, the Blue Drop Certified Systems awarded STLM a blue drop score of 97.4% (ranked 1st in the province, noting that the municipality continues to manage drinking water within their area of jurisdiction with distinction. STLM was ranked second in terms of waste water services in the Green Drop Report.

(3) Electricity

STLM is licensed to supply the following areas with electricity: Middelburg, Hendrina, Kwaza, Doornkop, Komati, Blinkpan and Koornfontein and comprises of the following divisions: Small consumer, Distribution and Planning and bulk connection. The provision of electricity within the municipality continues to increase since 1996. According to Stats SA Census 1996, 2001 & 2011, as of 2011, about 90.8% of households have access to electricity.

(4) Refuse Removal

Census 1996 shows that the municipality continues to improve expanding the access to refuse removal since 1996. About 84.7% households had access to refuse removal at least once a day. The municipal service extends to all the municipal towns but exclude the mining towns which are self serviced, Kranspoort, Somaphepha, Mafube and rural areas. The service will probably be extended to Somaphepha and Mafube when household numbers justify such action. The Middelburg area is experiencing spatial growth both residential and business. As a result, the current departmental resources cannot meet the demand for waste collection.

(5) Roads and stormwater

In 2011, the municipality had about 826km of total road network. Out of the 828km about 637.7km were tarred and about 188.4km were gravel roads. The 188.4km includes roads within farm areas which are privately owned and the municipality is unable to provide tarred roads.
CHAPTER 3

POLICY FRAMEWORK

3.1 The Planning Process

The LED Strategy forms a key part of the IDP, which is a single inclusive planning process; LED finds its space within this planning process. It is fully integrated into the IDP as it gives guidance to sector departments where priority areas are. 

Section 25 (1) of the Municipal Systems Act of 32, 2000 (Act 32 of 2000) provides that:

- each municipal council must, within a prescribed period after the start of its elected term, adopt a single, inclusive and strategic plan for the development of the municipality which:
  - links, integrates and coordinates plans and takes into account proposals for the development of the municipality;
  - aligns the resources and capacity of the municipality with the implementation of the plan;
  - forms the policy framework and general basis on which annual budgets must be based;
  - and complies with provisions of this Chapter; and
  - is compatible with national and provincial development plans and planning requirements binding on the municipality in terms of legislation.

3.2 The Mpumalanga Economic Growth and Development Path

The Mpumalanga Economic Growth and Development Path (MEGDP) is central for all planning in the province. The key objective of the MEGDP is to foster economic growth that creates jobs, reduce poverty and inequality in the Province. The LED strategy is developed within the context of this provincial development framework.

In accordance to the Municipal Systems Act 32, 2000 (Act 32 of 2000), sections 26 (c) and 26 (d):

An integrated development plan must reflect:
(c) the council’s development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs.

(d) the council’s development strategies which must be aligned with any national or provincial sectoral plans and planning requirements binding on the municipality in terms legislation.

MEGDP aims at creating labour absorbing economies and has identified the following initiatives to propel economic growth:

- Infrastructure development
- Climate change and green economy
- Agriculture and agro-process and rural development
- Minerals and beneficiation
- Manufacturing
- Knowledge based economies
- Tourism and business services
- Social economy
- Public sector
- The regional economy

The sector plans as identified by the province provide the basis and context of LED Strategy of the district municipality (Nkangala District) and Steve Tshwete Local Municipality.

3.3 The Constitution

The Constitution of the Republic of South Africa, 1996 (Act 108 of 1996); section 152 of the Constitution details the objectives of local government:

- To provide democratic and accountable government for local communities.
- To ensure the provision of services to communities in a sustainable manner.
- To promote social and economic development.
- To provide a safe and healthy environment
To encourage the involvement of communities and community organizations in the matters of local government.

3.4 The White Paper on Local Government

The White Paper on Local Government spells out a set of responsibilities that local authorities have obligations to economic development:

- That municipalities need to play a role in promoting job creation and boosting local economies through investing in basic services. Municipalities perform the following key functions in relation economic development planning processes (section B 2.3 of the White Paper on Local Government):
  - They review existing policies and procedures to enhance employment and investment.
  - Steps to promote businesses
  - Reviewing procurement policies to promote business activities
  - Establishment of a spatial framework which identifies land for residential, commercial and mixed development to help with speeding up rezoning.
  - Establishment of a user-friendly customer care management to increase quality and efficiency of local services.

Provide special economic services

- Municipalities provide marketing and investment support services in order to attract and secure potential investors.
- Provide small business support services thus assisting small entrepreneurs.
- Offer targeted services to specific sectors (research and technology services)
- Work with the Department of Labour in offering skills training and placements services.
- Reviewing of legislation which impedes LED.
- Assist certain sectors that show growth potential in a manner deemed necessary.
o Assists in the acquiring of certain set of skills and place the same in some industries.

o Support initiatives of other departments, eg, Department of Trade industry (Local Business Support Centres Program); Department of Labour (training and placement).

3.5 Municipal Systems Act

The Municipal Systems Act, 2000 (Act 32 of 2000); details the duties of the municipal council as provided by Section 28:

28 (1) Each municipal council, within a prescribed period after the start of its elected term, must adopt a process set out in writing to guide the planning, drafting, adoption and review of its integrated plan.

(2) The municipality must through appropriate mechanisms, processes and procedure established in terms of Chapter 4, consult the local community before adopting the process.

28 (3) A municipality must give notice to the local community of particulars of the process it intends to follow.

The LED Strategy finds its space within the Integrated Development Plan and therefore municipal council follows the outlined process in crafting an LED Strategy.

3.6 Broad Based Black Economic Empowerment

South Africa's first democratic government was elected in 1994, with a clear mandate to redress the inequalities of the past in every sphere: political, social and economic. Since then, government has embarked on a comprehensive programme to provide a legislative framework for the transformation of South Africa's economy. In 2003, the Broad-Based Black Economic Empowerment (BBBEE) Strategy was published as a precursor to the BBBEE Act, No. 53 of 2003. The fundamental objective of the Act is to advance economic transformation and enhance the economic participation of black people in the South African economy.

The Act provides a legislative framework for the promotion of BEE, empowering the Minister of Trade and Industry to issue Codes of Good Practice and publish Transformation Charters, and paving the way for the establishment of the BBBEE Advisory Council.
3.7 Preferential Procurement Act

The Act aims at giving effect to section 217(3) of the Constitution by providing a framework for the implementation of the procurement policy contemplated in section 217(2) of the Constitution; and to provide for matters connected therewith.

3.8 The National Development Plan

Government has already started a process to align the long term plans of departments with the NDP and to identify areas where policy change is required to ensure consistency and coherence.

It defines a desired destination and identifies the role different sectors of society need to play in reaching those goals. LED planning is crafted within this context; it is aligned to key objectives of the national development planning process.

The National Development Plan: Vision 2030 focuses on the following key priority areas:

- An economy that will create more jobs
- Improving infrastructure
- Transition to low carbon economy
- Reversing the spatial effects of apartheid in urban and rural areas
- Improving the quality of education, training and innovation
- Quality health for all
- Social protection
- Building safer communities
- Reforming the public sector

3.9 Mpumalanga Vision 2030

Mpumalanga Vision 2030 formulated a development rationale for future economic growth revolving around eight key drivers:

Key Driver 1: Nodal Development
Key Driver 2: Business, Commercial and Industrial Development
Key Driver 3: Tourism Development
Key Driver 4: Forestry Development
Key Driver 5: Agricultural Development
Key Driver 6: Mining and Energy Related Development
Key Driver 7: Urban Development
Key Driver 8: Rural Development

Below is the reflection of how the municipality has aligned its strategic objectives in line with the Mpumalanga vision 2030 key drivers
3.10.1 Nodal Development

**FOCUS AREA**
Economic diversification

**NDM proposed intervention**
Mixed use nodal centres, nodal marketing, infrastructure development, foreign direct investment and agro-processing
Include retail and transport nodes in all future township. Layouts and development nodes.

**STLM Initiatives and current activities**
Promote development in all three developmental nodes (Primary, Secondary, and Proposed Nodes). Align all nodal development with proposals from SDF.

3.10.2 Business, Commercial and Industrial Development

**FOCUS AREA**
Industrial Development
Big business

**NDM proposed intervention**
Encourage iron and steel beneficiation incubator
Attract local and foreign direct investment into the region
Improve cooperation and participation by private sector to wide initiatives (CSI)
Support from industry and suppliers to EPWP Learner Contractors.

**STLM Initiatives and current activities**
Facilitate access to serviced land for business development.
Invest in infrastructure development
Node D development and Local steel Hub initiative

3.10.3 Tourism Development

Tourism has the ability to grow the local economy and stimulate small enterprise and rural development as detailed in the Mpumalanga Vision 2030 priorities.

**FOCUS AREA**
Loskop Leisure Resorts (Aventura)
Botshabelo Heritage site
Middelburg Dam
Tourism Info Centre
Little Elephant
Olfants River Lodge
Loskop Marathon and Train Race
Other sports and entertainment
Year end events (STLM cross – over)
Arts and cultural festival
Banquet hall
Country Club and golf course

**STLM Initiatives and current activities**
High level profiling of the Loskop Aventura resort as a key component of the tourism belt on the N11 corridor
Total revamp of the Botshabelo heritage site is required; extending the tourism belt on N11 that links Limpopo with the CBD.
Rework the ownership and management structure of the site.
Revamp the site to include cabin accommodation
Disseminate information from the Middelburg information centre: cabin accommodation, hiking trails, cheetah farming, fishing games
Develop a market access strategy including improving signage
High profiling of the events
Brand the Loskop Marathon to be at the same level as the Comrades Marathon level through TV and other forms of advertising, invite high profile athletes.
Accelerate the process of establishing the hotel to encourage local accommodation.
Create a calendar of major events (standardised the dates) eg Joyous Celebration
Revamp Kees Taljaard to bid for professional soccer matches.

**3.10.4 Agricultural Development**

**FOCUS AREA**
Agriculture development
Renewable energy
Resource mobilization

**NDM proposed intervention**
Commission and implement agro-processing value chain development strategy
STLM to be considered on competitive advantage on agriculture even if it is in a low scale.
Exploit opportunities generated by green economy efforts.
Agriculture infrastructure development (dams, irrigation facilities, agro-processing, etc).

**STLM Initiatives and current activities**
Promotion of sustainable land reform and security of tenure via agric –Village
SMME’s and corporative development
Agric hub development
3.10.5 Mining and Energy Related Development

**FOCUS AREA**
Mining (Coal)
Resource mobilization
Capacity development

**NDM proposed intervention**
Provide extensive support on the mining industry in the long term, especially on value adding.
Provide cost-effective infrastructure for labour absorbing activities.
Skills development for mining sector and support for mining small and medium enterprises.

**STLM Initiatives and current activities**
Conduct economic study on the mining sector and economic impact
Establishment of steel fabrication hub
Training of constructors and improving CIDB grading levels

3.10.7 Urban Development

**FOCUS AREA**
Developing inclusive economy
Mixed Use Nodal centres

**NDM proposed intervention**
Inner city economic development and inclusive rural economy.
Develop strategy for procurement of land close to existing economic development zones.

**STLM Initiatives and current activities**
Ensure integrated economic planning and development
Promote STLM as an eco-tourism destination of choice
Create a hierarchy of functional towns and settlement
Township economic development

3.10.8 Rural Development

**FOCUS AREA**
Developing inclusive economy
Facilitate business creation
**NDM proposed intervention**
Attend to rural development initiative
Facilitate establishment of at least two shisanyama businesses in each local municipality
Promote rural development

**STLM Initiatives and current activities**
Development of Hendrina Mall
Third phase development of the Middelburg Mall
Revive township business
Ensure equitable access of social infrastructure and promotion of LED by way of MPCC’s and agricultural village

CHAPTER 5

5.1 DEVELOPMENT OF THE LED STRATEGY

5.1.1 Strategic Focus

Based on the situational analysis, the development of the strategy revolves around the following focus areas:

- Promoting investment along the N4 development corridor with specific focus on enhancing the stainless steel cluster in Middelburg.
- Focus on the sustainable extraction and beneficiation of local minerals with comprehensive mining rehabilitation programs to enable the re-used of mined land.
- Facilitate the beneficiation of local agricultural produce and export finished products.
- Promoting Steve Tshwete as an eco-tourism destination of choice.
- Continuous maintenance and upgrade of infrastructure and engineering services in order to meet business and industry development.
- Development of human capital in manner that links formal academic education to industry-based training in order to meet the skills requirements of the leading local economic sectors.
- Development of a regulatory environment that promotes small and medium enterprise growth, for example, preferential procurement, Broad Based Black Economic Empowerment initiatives, etc.
- Development of township economy

5.1.2 Vision

To be the leading community driven municipality in the provision of sustainable services and developmental programmes.

5.1.3 Mission

We are committed to the total well being of all our citizens through:

- Rendering affordable, cost-effective, accessible, efficient and quality services;
- Effective management systems, procedures, skilled and motivated workforce;
- Maximising infrastructural development through the utilisation of all available resources;
- Improving the quality of life by co-ordinating youth, gender and social development programmes;
- Creating an enabling environment for economic growth and job creation
- Ensuring effective community and relevant stakeholder participation and co-operation;
- Ensuring skilled, motivated and committed workforce; and
- Compliance with the Batho-Pele Principles;
- To strive to sustain the fiduciary position of the municipality towards achieving the clean audit.

5.2 KEY STRATEGY OBJECTIVES

Through consultation with partners (government stakeholders, organized labour, industry associations and business chambers), develop long term master plans that promote external investors.

Maximise the job creation potential of key sectors, through a partnership of local, provincial and national role-players.

Retention of current investment and solicit future investment and growth through incentive packages (flexible tariff and rate structure, serviced land, stable supply of water and electricity, etc).

Diversify and broadening key local sectors (steel manufacturing) through downstream beneficiation programs.

To grow the local economy by 4% by 2019.

Strengthening government- supported entities, increasing their capacity with a view of stimulating opportunities for small and medium enterprises in the manufacturing industry, particularly steel manufacturing:

- The steel incubator, Mpumalanga Stainless Initiative to include post incubation programs; steel fabrication and production plant that will be used by graduating incubates.
- The tooling initiative, Mpumalanga Tooling Initiative, to be assisted to expand its tooling initiative, artisan development skills and establishment of the tooling room.
- Develop the capacity of Mpumalanga Stainless Steel Cluster to assist entrepreneurs to access markets, conduct research, and develop entrepreneur and management skills.
Make more land available for small and medium enterprises at the HEDC centre, show ground, and other available areas.

Creating secondary industries out of the mining sector, e.g., recycling, cement manufacturing through mining bi-products or waste, processing of coal waste into secondary products (pellets, briquettes), identifying opportunities for quarrying, etc.

Develop a coordination program (culminating into a structure) to facilitate the development of industry-specific opportunities in conjunction with industry associations and business bodies.

Continuous alignment of LED strategy to economic trends through the establishment of a panel of economic advisors to the Council.

Coordinate all developmental issues as initiated by various government sector departments in the local municipality.

Continuous improvement and updating of the investor guide incorporating new developments and economic opportunities.

5.3 Municipal Strategic Goals

Four (4) strategic goals have been identified to drive the vision and mission of the Municipality:

- Creating a municipality which is, through its financial and human capital together with all other resources, totally focused on the well-being of all its citizens;
- Economic growth, job creation and poverty alleviation;
- All residents enjoy the best possible level of municipal services;
- Creating a space within which a caring society is economically, spatially, environmentally and socially integrated and developed.

5.4 Municipal Investment Strategy

The municipality offers a stable environment for investment and economic development:

- Access to municipal owned land at affordable rates; both serviced and underserviced land
- Stable and uninterrupted water and electricity supply.
Good road and rail transport infrastructure linked to major cities (Pretoria – Johannesburg through N4 / 12 also linking the municipality with Mbombela; Groblersdal - Hendrina – Ermelo – Richards Bay on N11).

The municipality offers tax holidays on assessment rate or discount during certain period or during construction and establishment according to Council policy, depending on:
- Size of the erf to be occupied.
- Number of direct jobs to be created.
- Corporate Social Investment policy of the institution.
- Potential income for the municipality in terms of trade services (water, electricity, sewage and refuse removal)
- Potential secondary business
- BBBEE grading

The municipality has the following investment opportunities:

- Manufacturing presents investment opportunities in downstream beneficiation of raw material, as proposed through establishing a steel and metal fabrication hub and the tooling initiatives as a sub sector of the steel manufacturing industry.
- Expanding the local hospitality industry to establish a hotel and link that to the activities of a banquet hall and the business activities.
- Land available for mining purposes; as per proposals submitted to Department of Mineral Resources by mining companies for prospecting rights.
- Through land reform policies, Rural Development and Land Reforms are making land available for agricultural purposes, especially for emerging farmers.
- Increasing the provision of local private healthcare capacity.
- Establishment of a production facilities to manufacture steel material
- Establishment of solar energy solutions for areas that are not electrified yet and cater for the escalating demand for energy.
### 5.5 SECTOR SPECIFIC DEVELOPMENTAL CONSTRAINTS AND IMPACT

<tr>
<td>Tourism</td>
<td>Ageing infrastructure&lt;br&gt;Lack of investment in formal accommodation facilities (hotel)&lt;br&gt;Limited secondary tourism services, eg car hire services, tour guides,&lt;br&gt;No documented tourism routes, hiking trails,&lt;br&gt;Limited game facilities (only Alzu game reserves, Middelburg Dam fishing)&lt;br&gt;Botshabelo cheetahs farm neglected</td>
<td>Underutilized tourism facilities&lt;br&gt;Business opportunities lost to neighbouring municipalities as a result of not having a hotel&lt;br&gt;Inability to host national and provincial events due to accommodation</td>
<td>Establish a hotel and conferencing facility&lt;br&gt;Attract secondary tourism services (travel agency services, car hire)&lt;br&gt;Improve tourism attraction sites, rebuilding Botshabelo, Fort Meresnky&lt;br&gt;Improve information sharing and signage to tourism establishment&lt;br&gt;Promote other activities that will benefit tourism, eg, hosting of national events&lt;br&gt;Using sport to improve the image of the town, eg, Loskop Marathon, Train Race.&lt;br&gt;Improve sporting facilities to host professional soccer matches</td>
</tr>
<tr>
<td>Energy</td>
<td>Unreliable supply of energy (electricity)</td>
<td>Interruption to business activities&lt;br&gt;Cost of establishing back up infrastructure</td>
<td>Establish alternative energy generating solutions</td>
</tr>
<tr>
<td>SMME Development</td>
<td>Underdeveloped emerging entrepreneurs&lt;br&gt;Lack of technical and business skills&lt;br&gt;Stringent supply chain policies</td>
<td>Lost procurement opportunities&lt;br&gt;No adequate access to markets&lt;br&gt;Limited service providers</td>
<td>Incubation program for SMME&lt;br&gt;Supplier development program&lt;br&gt;Training and capacity building</td>
</tr>
</tbody>
</table>
5.6 ECONOMIC ACTIVITY NODES

The following are some the identified hierarchy of economic nodes/areas within the STLM in line with the proposals of the Spatial Development framework 2014/15.

5.6.1 Primary Nodes

Middelburg Central Business District is the primary activity node of the municipality; the largest commercial centre of the municipality. Concentrated on Cowen Ntuli, OR Tambo, SADC and Walter Sisulu Streets, it is a strong area for retail and commercial development, service industries, community facilities; government buildings and municipal offices are located here.

Hendrina Central Business District forms part of the primary economic activity node within the municipality. Also it comprises a combination of retail, wholesale trade, financial services, municipal and government services.

5.6.2 Secondary Nodes

The following are the existing secondary nodal points:
- Midwater business complex
- The Middelburg Mall, located south towards the N4
- OK node, east of Fountain Street
- Kanonkop node within the residential area, Kanonkop
- Rockdale node
- Nazareth node
- Mhluzi node
- Mhluzi Mall, extension 2/4 towards the south of Mhluzi

5.6.3 Proposed Nodes

- Kanonkop node is the proposed future node and will be located at the intersection between Walter Sisulu and Protea Street.
- Node D south of Mhluzi towards the bricks manufacturing industries; earmarked for light industries

5.6.4 Multi Purpose Community Centres (Thusong Centres)

Further nodal points identified for the purpose of enhancing and access to social services:
- Mhluzi Extension 7
- Doornkop
- Rockdale
5.7 LED STRATEGIES AND OBJECTIVES 2015 - 2020

**Strategic Objective:** To ensure a better life for the society by coordinating sustainable social and economic developmental programmes.

CHAPTER 6

GREEN ECONOMY

6.1 What is Green Economy

United Nations Environment Programme (UNEP) defines a green economy as one that results in improved human well-being and social equity, while significantly reducing environmental risks and ecological scarcities. It has low carbon emissions, resource efficient and socially inclusive.

A municipality with ‘a green economy’ will therefore be characterised by:

- Reduced dependence on fossil fuels.
- Introduction of cleaner fuels and renewable energy.
- Increase in energy and transport efficiency.
- Efficiently managed resources in the pursuit of economically and environmentally sound development.
- Prevent the loss of biodiversity and ecosystem services

6.2 Challenges of Transition to Green Economy in STLM

The local economy is dominated by the manufacturing and mining industries as well as a presence of several power stations. All of these manufacturing and power plants are coal-fired, which has significant implications on the carbon footprint of the municipality. The neighbouring municipality has twice the number of mining companies and power stations and therefore contribute further to the degradation of the local environment.

In addition to the main urban centre of Middelburg, several small towns have been created to serve specific mines and power stations, like Arnot, Rietkuil, Pullenshoop, Rietspruit, etc. The economies of these towns solely depends on these industries for employment and the business spin offs. This therefore provides a major challenge to develop and implement strategies on transition to low- carbon emission industries.
6.3 Alignment with Policies and Plans

The current municipal strategies as detailed in 2015 / 2016 IDP, 2006 LED (under review) are crafted within the context of the national policies (NDP), provincial (Mpumalanga Economic Growth and Development Strategy) and the district’s IDP.

The current review of the 2006 LED is a transition to a low carbon emission with the municipality implementing a green policy in its building. The review strategy is identifying environmentally friendly developmental programs:

- Recognition of the importance of conserving the natural environment and water resources;
- Tourism development, particularly in the mountainous north-west;
- Promotion of agricultural activities, including protecting the available agricultural land-base, supporting commercial farming and agro-processing.
- Encouraging private investment, including the view of industrial and Big business development as a key growth lever;
- SMME support and development;
- Job creation through CWP and EPWP, especially with regard to environmentally beneficial projects;
- The need for developing the local human resource base;
- The need for an effective and efficient public transport systems that serves both rich and poor;
- Align the legal framework to create a favourable regulatory environment to enable a transition to low carbon emission economy, eg flexible property rates (Municipal Property Rates Act).

6.4 Recommended Strategies for Transition to Green Economy

The following are the recommended steps and action plans for the implementation of green economic development strategies:

- Safeguard the economic potential of the natural resource base in order to reduce the dependency of the local economy on manufacturing and mining. It is key for the municipality to find a balance when planning land allocation between agriculture and mining. Furthermore, post-mining activities should entail rehabilitating mined areas back to its original state for agricultural use.

- Mine Water Rehabilitation is becoming critical as it provides for the re-use of mine water for industrial purposes. The municipality is a water scarce
municipality and this is further aggravated by the acid mine drainage. Some of our exported agricultural products will be affected by this if we use poor water quality. The water reclamation plant establishment jointly with Shanduka aims at rehabilitating the mine contaminated water for re-use by industries. This improves water security and helps reduce the negative impact of mining activities.

- Construction of wetlands is a once off investment that reduces acidity and heavy metal concentrations. Working for Water Program of the Department of Water Affairs aims at preserving wetlands for the purpose of rehabilitating acid water. This is done through the EPWP as managed by Public Works.

- Creating secondary industries out of the mine dumps and rehabilitated mine areas, for example, converting coal waste into briquettes and pellets, cement manufacturing, recycling, etc.

- Improve railway infrastructure and public transportation systems to reduce reliance on road transportation

- Explore alternative energy sources in order to reduce dependency on the use of electricity, coal and biomass by working in partnership with the private sector to implement waste to energy projects (landfill sites, waste water treatment plants).

- Introduce incentives for companies/industries employing cleaner production systems (wrt waste generation, water usage, energy use, harvesting of rain water).

- Incorporate aspects of the green economy in new developments. (e.g all building plans to be installed with solar power system before approval).
### 6.5 A Summary of Key Indicators: Transitional Steps to Green Economy

<table>
<thead>
<tr>
<th>Recommendation/outcomes</th>
<th>Proposed Actions</th>
<th>Economic Transition Outcome Indicators</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use the full potential of natural resources</td>
<td>Increase agricultural activities to diversify local economy</td>
<td>Reduced reliance on mining and manufacturing sectors for economic growth</td>

7.2 MONITORING AND EVALUATION

In order for the municipality to effectively plan and implement this LED Strategy, the following should be developed:

- Approval of the LED Strategy and terms of reference for the establishment of the LED Forum.
- Appointment of LED Advisors.
- Establishment of the LED Forum.
- The priority projects and development facilitation focus areas, prioritised through stakeholder consultation and through the use of a project prioritisation matrix required for the 5-year period of the strategy.
- Implementation plan of the strategy along with actions plans, timeframes, financial and other resource requirements, for example a spatial plan framework aligned to the LED process.
- An effective monitoring and evaluation system in order to assist the LED unit in tracking the progress with regards to economic development.
- Align the LED Strategy to internal policies, budget processes and risk strategies.
- Establish an LED Forum to monitor the implementation of the LED Strategy, aligning it to economic trends and development.
- Improve the capacity of the LED unit to effectively implement the strategy.
- Establishment of a partnership model with other key stakeholders (both private and sector institutions).

### 7.4 CONCLUSION

The LED Strategy is developed to create an economic framework within which broader sectoral opportunities will be identified, prioritized and implemented.

It aims at translating the IDP into economic principles and strategies for further implementation. It has to be continuously aligned with ever changing economic trends.

It finds its context within the framework as created and provided for by other spheres of government.
